

# **ByBox** grows with its customers

Which is why we are the UK's fastest growing technology company in 2007\*

## ByBox did . . .

In 2006 The RAC launched the UK's first pay-as-you-drive insurance product in conjunction with its parent company, Norwich Union. Serialised tracking of the smart black-box (telematics device) was absolutely essential to guarantee the zero tolerance supply chain that was critical to the product's success. Equally important was ByBox' software development ability to deliver the integration required with RAC and its partners.

ByBox configured its ThinInventory™ platform to implement a serialised supply chain providing 100% accuracy.

Net result: successful supply chain, successful service.
