

# Inbound Europe

If you have stock held in Europe and need it to be delivered to your UK workforce by 8am the next morning

## Key benefits

- Reap the financial benefits of centralising your warehousing operation in Europe without compromising the SLAs of your UK operation
- Late hub enables centralised European warehousing with acceptable picking cut off times. This can bring enormous savings in both stock and infrastructure
- Picking cut off at 7pm from locations such as Eindhoven, Munich, Frankfurt and Antwerp and still deliver by 8am the next morning in the UK

## How it works

ByBox has extended the trunking times from its hub until midnight. This gives sufficient time for stock to be picked, packed and transported from a centralised European warehouse and still be delivered by ByBox into the engineer's box by 8am the next morning/direct to site pre 10am.

**We can manage your whole supply chain process from start to finish.**

## Financial considerations

- Do time restrictions for through the night deliveries mean that you are unable to look at suppliers outside of the UK?
- Are you holding duplicate stock in the UK and Europe?
