

# Contactless Delivery

## Keep your engineers safe with contactless deliveries

With 24x7 access to 40,000 lockers at over 1,000 UK sites, engineers can pick up parts quickly and easily, whilst maintaining social distancing.

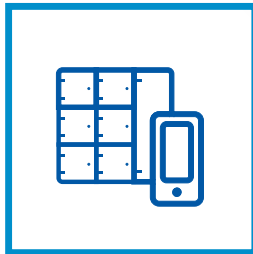

With ByBox, engineers have the peace of mind of fast and safe parts collection so they can focus on helping customers.

## How it works:

Assured Pre-8am delivery with notification; engineers know their part is ready for collection.

24x7 access to every locker with no queuing to pick up parts, ensures social distancing can be maintained.

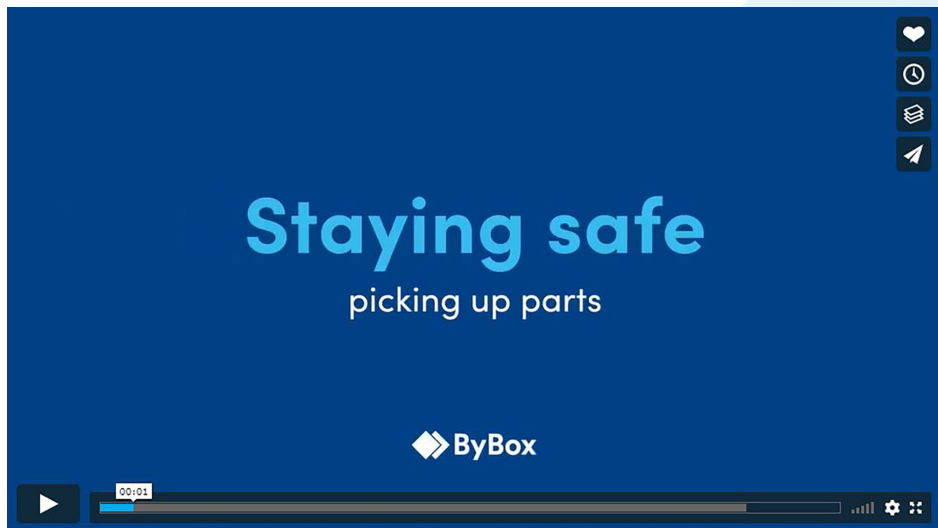

Collections are completed through the app. No handling keys or typing in PINs.

# How it can help your engineers stay safe

Watch our short video on this process:

## ➤ Ready when your engineers are

Engineers can track deliveries on the mobile app so they can be confident that the part is ready for them before setting out. Stored in our secure lockers your parts will be safe and the engineer can plan collection around their schedule.

## ➤ No need to queue

With 24x7 access to 40,000 lockers at over 1,000 UK sites, contact is greatly reduced and engineers can maintain social distancing.

## ➤ Fast and simple collection

Collection is handled through the app; Engineers don't need to bring a key or enter a PIN. Collection is quick and easy; taking seconds not minutes.
