

# Generate regular rental revenue by hosting ByBox lockers

Field Service is a booming industry performing a vital function; keeping today's technology, infrastructure and machinery running. There are an estimated 20 million field service engineers working today and this number is growing rapidly.

Success depends on an engineer's ability to complete each job quickly and efficiently. Ready access to parts that are close to them is critical to providing a great customer experience and meet service level agreements. ByBox's smart lockers and technology provide a modern solution to this field service challenge.

ByBox strategically locate lockers in areas that are convenient for engineers and deliver crucial spare parts into them. This means engineers spend less time picking up parts and more time helping customers.

We're expanding our network to meet customer demand and are always happy to hear from owners interested in hosting our lockers.

## Benefits for host partners

Being a hosting partner has numerous advantages:

- ◆ Once installed, our smart lockers generate recurring revenue from space that would have otherwise been unused
- ◆ Sites will benefit from increased foot traffic
- ◆ There will be no disruption to your core business
- ◆ There are absolutely no costs to you. The equipment is installed, owned and maintained by ByBox
- ◆ No power is required as the locker is powered by batteries

## Why work with ByBox?

Founded in 2000, ByBox is a global final mile technology and services company. We handle over 30 million critical parts a year for the field engineers of many blue-chip companies.

ByBox lockers are installed in 16 countries globally, with our largest network in the UK with over 40,000 lockers.

Currently, the US has 200+ lockers installed and is growing rapidly. Our goal is for the US business to replicate and grow beyond, our success in the UK. Together we can achieve this.

## Requirements

We have a few basic requirements for becoming a site host:

- ◆ Required space for installation should be approx. 2 inches greater than the dimensions below. (6'3" width, 5" deep and 7'4" tall)
- ◆ 24/7 access to the locker location
- ◆ Preferably in well-lit areas with easy drive access
- ◆ Flat, solid ground to install on (a concrete base can be installed if space is suitable)

## OUTER DIMENSIONS & ELEVATIONS

Standard Configuration

Double Column: *Front Elevation*

Double Column: *Side Elevation*

### Modular Options

Single Column

Triple Column

## DATA

<b>Power</b>	Battery powered – 2 years approx. on a single charge
<b>Bluetooth range</b>	8.2 feet from locker
<b>Transporting temp.</b>	-4 to +122°F
<b>Operating temp.</b>	-4 to +122°F
<b>Weight</b>	551 lb
<b>Material</b>	Mild steel
