

Rethink Your Final Mile Inventory

INTELLIGENCE | VISIBILITY | SECURITY

Field service is one of the most critical functions in business, and yet most companies are still using manual, outdated ways to manage inventory in the field. This is costing time, money, inventory, and customers.

What do your teams say?

58%

of field service professionals say top pressure is competition in service

50%

of FTF failures are due to needed or missing parts

38%

of technicians say they can't access all the information needed

45%

of field technicians say their current tools are not fast enough

What do you get with ByBox?

Achieve better first-time fix rates

Without lost or missing parts, your jobs can be completed the first time, everytime.

Gain visibility and control inventory

Critical parts are no longer lost or sent to the wrong place. Parts are always visible in a secure location with tracking in and out.

Optimize inventory

By placing inventory where it's needed and dramatically reducing truck stock. You have the parts you need when you need them.

Increase customer satisfaction

When you improve your FTF rate and meet tight SLAs, you keep your customers happy and increase your Net Promoter Score.

Reduce logistics costs

By removing the need for expensive premium deliveries and providing a 24/7 fixed delivery point.

Improve engineer productivity

Eliminating lost or misplaced parts and ensuring part availability reduces time wasted by engineers.

Powerful Integrations

ByBox integrates with the top field service software providers, including Microsoft and Salesforce.

Are you ready to make a change?

Take control of your field service inventory and prove you are an industry leader by taking advantage of the only solution that can get your parts closer to the edge of service.
